

Microbiology Chemicals, Reagents and Dilution Products

Hach microbiology chemicals and dilution products allow users flexibility in microbiological analyses. Customise your media or dilute samples to accommodate sample-specific requirements. Hach offers sterile sample bottles, dilution water, colour indicators, buffers, acids, reagents, culture tubes, and powders for use in the microbiological testing process. Products are available for recreational water, wastewater, drinking water, and other processes and sample matrices. All reagents undergo a rigorous inspection and QA/QC process before leaving the facility.
