

PTV 2000 - EPA

Next Generation of On-line Turbidity Measurement

Turbidity is the key measurement parameter for determining drinking water quality.

To develop this instrument, Lovibond® Tintometer® assembled a team of globally recognized turbidity experts. We tasked them with creating a new process instrument that addresses all of the issues customers struggle with while using their current turbidity systems. These advancements, along with the addition of state-of-the-art communications and user interface make the PTV 1000 and PTV 2000 the next generation of process turbidimeters.

Products:

Title	Part Number
PTV 2000 with flow indicator	6144683
PTV 2000 with flow indicator and Bluetooth	6144684
PTV 2000 with flow indicator and Modbus	6144693
PTV 2000 with flow indicator, Modbus and Bluetooth	6144694
PTV 2000 basic unit	6145683
PTV 2000 with Bluetooth	6145684
PTV 2000 with Modbus	6145693
PTV 2000 with Modbus and Bluetooth	6145694
