

Sension+ Portable Meters

Sension+, an all-in-one system with guided menu navigation, makes general electrochemistry testing fast and simple. Each system comes complete with everything you need to start testing.

Sension+ portable instruments offer real one-hand operation with ergonomic and lightweight design and IP67 protection. Screw-on calibration tubes simplify on-site calibration and minimise buffer consumption.

Sension+ portable kits are designed as complete field solutions – from single parameter pH meters up to multi-parameter systems for simultaneous measurement of pH, Temperature, Conductivity, and ORP, or Dissolved Oxygen with just one multi sensor.
