

Hach BioTector B3500dw TOC Analyser

Maximum uptime and reliability for TOC analysis in drinking water applications

The Hach BioTector B3500dw uses innovative technology that only requires scheduled maintenance every 6 months and delivers 99.86% uptime ensuring total confidence in your TOC measurement.

Rock solid reliability

With unique, EPA method approved Two Stage Advanced Oxidation Technology, the self-cleaning sample reactor of B3500dw delivers maximum reliability.

Lowest cost of ownership

With its 99.86% uptime, semi-annual maintenance and reagent replenishment is all that is needed.

Secure your source water

TSAO technology analyses organics in your source that are invisible to scanning UV technologies.
