

## 9184 sc Amperometric Chlorine Analyser

The 9184 sc free chlorine analyser is ideal for drinking water distribution monitoring, chlorination applications, demineraliser systems, wastewater, or cooling water processes due to its 0 to 20 ppm range. The minimum detection limit of 5 ppb (0.005 mg/L hypochlorous chlorine in the form of HOCl) lets the 9184 sc excel at near zero chlorine readings.

The all-inclusive 9184 sc free chlorine system comes pre-assembled on a panel. Just mount the panel in the desired location, insert the sensors, and connect the controller to get started. The membrane system of the sensor means there are no reagents used for measurement. Maintenance is minimal and two years of typical maintenance items are included with the system.

Part Number	Description	Parameter	Measuring range	GBP Price
LXV430.99.00001	9184sc Hypochlorous Acid Chlorine Amperometric Sensor	Active Free Chlorine: Hypochlorous Acid Only	0 - 20 mg/L hypochlorous acid HOCl	Contact Us
LXV432.99.00001	9184sc Total Free Chlorine Amperometric Sensor	Total Free Chlorine: Sum of hypochlorous acid, hypochlorite and free chlorine	0 - 20 mg/L HOCl	Contact Us
