9187 sc Chlorine Dioxide Analyser

The 9187 sc Chlorine Dioxide (ClO₂) Sensor is an online, single-channel industrial sensor that measures ClO₂ in drinking water treatment plants, distribution networks, and other applications that require monitoring ClO₂ at ppb and ppm levels.

The all-inclusive 9187 sc chlorine dioxide system comes pre-assembled on a panel. Just mount the panel in the desired location, insert the sensors, and connect the controller to get started. The membrane system of the sensor means there are no reagents used for measurement. Maintenance is minimal and two years of typical maintenance items are included with the system.
