ARTI Particle Counter

The ARTI particle counter is Hach's most accurate particle counter with up to 1 μm sensitivity. The ARTI's external mounted sensor is easily cleaned and separated from the instruments electronics providing lifetime peace of mind. Measurement data is available on the instrument's LCD display or remotely via an RS485/4-20mA output. The ARTI can be used as a stand-alone instrument, or in combination with turbidimeters for the ultimate filtration optimisation.
